Press Release, For Immediate Release

September 1, 2008

The name "GUSTAV" has been pre-coded to contain detailed particulars about the hurricane -- it's location, exact date and other facts.

Even though most people will automatically disregard the contents of this press release, others have had personal experiences which will make them very interested.

According to George R. Simpson, a noted engineer, inventor, and businessman, the English language has been pre-coded to contain messages. The pre-coded messages pertain to today's world, events, personalities, practices, and dates. The results of the translations are blunt, anti-establishment, anti-rich, anti-religion. Thousands of sample "decodings" of these hidden messages are contained on two websites: WWW.UfoEtBlog.com and WWW.EtCornGods.com.

Mr. Simpson was "visited" in 1985 by an extraterrestrial presence and told about the hidden messages in the English language. He was told that it was his job to decipher the hidden code and "tell it to the world". He has worked for 23 years to complete his assignment.

The language for decoding the hidden messages is named "The ET Corn Gods language/game". Mr. Simpson explains that the ET Corn Gods language translation matrix is very elegant and a "geek's dream" decoding challenge.

Attached to this press release is a decoding of the word "GUSTAV". The results of the decodings include:

"Gulf Coast Storm US *Of God*," "Fast Aid" and "Fret, 1 Sept. 2008 AD, ET"

Over 5 million visits have been made to the home page of the leading Corn Circle website homepage of www.cropcircleconnector.com. According to George Simpson, the Corn Circles (thousands of magnificent designs in growing fields of the world) are coded announcements of the coming of the ET Corn Gods language/game.

Speaking about the "GUSTAV" translation, Mr. Simpson remarked:

"If God can predetermine the structure of every word in the English language, wouldn't you believe, then, that God also makes all weather and storms?"

The translation results mean different things to different people. Here are the comments made by Peggy Johnson of Greenville, NC about the "GUSTAV" translation:

"Clearly the ETs are mad because people are not listening to them! Only by listening to them and not false religions can future disasters be avoided.

They are not without mercy telling in advance what they are going to do and to send aid.

There simply can be no doubt!!"
